

Machine Coordinator: Steve Werkema
Machine Conditions: Stack, Stash and Store

- Weekly update

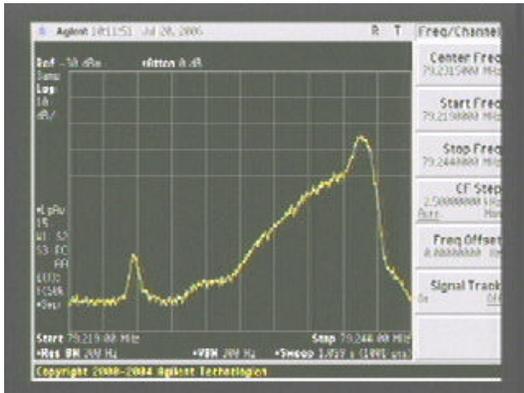

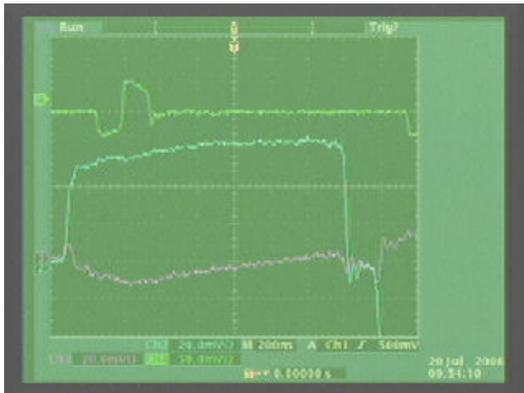

○

- PLC Failure on Sunday. Resistor bank in D:IB.
- For stacking, intensity on target up 15%.
- Stacktail had a shallower slop in February.
- Observations
 - Present best stacking rate 15.4ma/hr. 8% better than last week and 30% below all time best
 - bEam on target increased from 6e12 to 7e12 this week - 15% increase. 15% below the best week of stacking
 - Stacking rate increased yb only about 10% in response the increased intensity on target
- Energy mismatch
 - A:RLLEXF 628769.5HZ (energy before)-> 628765.5Hz (energy after change). Error reduced to a pure phase error.
