

- Added ability to change gain of two legs. <http://www-bd.fnal.gov/cgi-mach/machlog.pl?nb=pbar08&action=view&page=366&load=d:PBTMF>
  - d:PBTMF
  - More gain in long leg is worse.

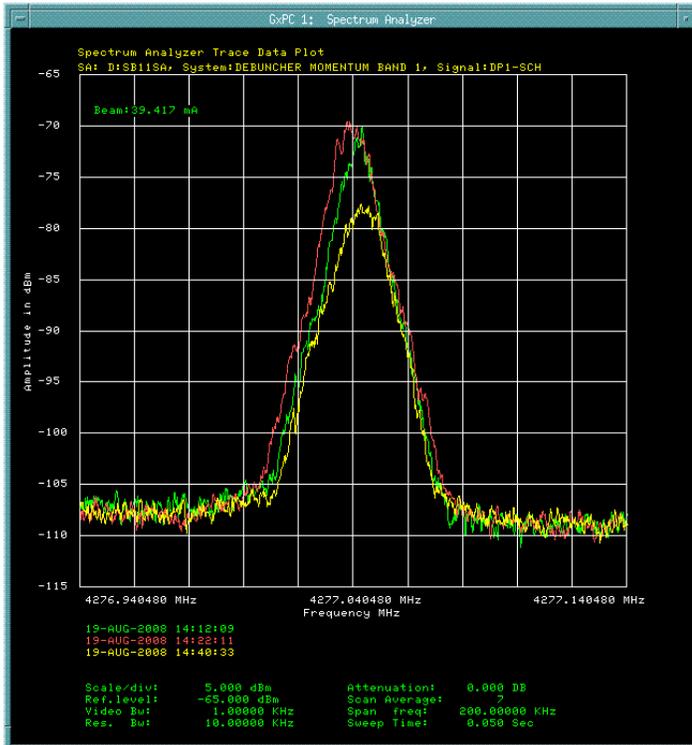

- Increase long leg, and things get worse....

○

○ Lowering leg 2 gain, things get better

○ Green start, red more gain, yellow less gain.

○ To do list

- Hardware
  - Core vertical equalizers in progress.
    - ◆ Horizontal ones were a complete wash.

- ◆ Vertical ones should be weeks away.
- Horizontal delta leg hardware
  - ◆ Microwave hardware is there
  - ◆ Will steal the controls from something else, since not enough room in crate
- Need to understand why the Debuncher notch filter upgrade failed.
